Now connect your Android device to your computer with the help of USB cable and click on 'Unlock Android Screen' option. Step 2: Select device model. In the list, you can find all the supported device models. Step 3 - Enter into Download Mode To get Android device into Download Mode, follow the below mentioned instruction: Switch OFF the phone. Press Power button and Volume Down button all together at the same time. Now finally press Volume Up button to enter into Download Mode. Step 4 - Download Recovery Package Once you enter into download mode, it will start to download the recovery package. Just wait for download to get complete. Step 5 - Remove Android Device Screen Lock Without Losing Data After the download to get complete. process is over, now you can use your Android phone without password and can preview all the data on phone without any limit Part 2: Unlock Android lock screen using advanced mode If you fail to find your device model from the list then you should select Advanced mode If you fail to find your device model from the list then you should select Advanced mode If you fail to find your device model from the list then you should select Advanced mode If you fail to find your device model from the list then you should select Advanced mode If you fail to find your device model from the list then you should select Advanced mode If you fail to find your device model from the list then you should select Advanced mode If you fail to find your device model from the list then you should select Advanced mode If you fail to find your device model from the list then you should select Advanced mode If you fail to find your device model from the list then you should select Advanced mode If you fail to find your device model from the list then you should select Advanced mode If you fail to find your device model from the list then you should select Advanced mode If you fail to find your device model from the list then you should select Advanced mode If you fail to find your device model from the list then you should select Advanced mode If you fail to find your device model from the list then you should select Advanced mode If you fail to find your device model from the list then you should select Advanced mode If you fail to find your device model from the list then you should select Advanced mode If you fail to find your device model from the list then you should select Advanced mode If you fail to find you fail t phone Step 1: Choose second option (advanced mode). Here you should choose second option mentioned 'I can't find my device model from the list above' Now Android Unlock will prepare lock screen removal When configuration file is finished, tap on 'Unlock Now' Step 2: Enter into Recovery mode Here you should boot your device into Recovery mode. Steps are as follow for Android phone with Home button: First, turn off Android phone first Then long press Volume Up + Home + Power button instantly for few seconds Now release all buttons when logo appears Steps are as follow for Android phone without Home button: Switch off your Android phone, when you are asked to enter lock screen password then long press Volume Up + Bixby + Power for sometime After that, release all buttons when logo is seen on phone screen Step 3: Bypass Android lock screen Once Recovery mode is activated, you need to follow the on-screen instructions to delete phone settings After some time, the lock screen will be removed from Android Phone Password Using Google Account After trying several times, if you still can't unlock Android phone password without factory reset, then you can use Google Account for it. What you have to do is, you have to access the Google account that the device is linked with and then follow the steps: Only you have to try after 30 seconds. You will see "forgot pattern" on the bottom of the screen Here you have to provide the Gmail

account that is linked with the device and then click "Next" option. That's all, here you can now provide any new pattern or PIN to unlock your device that you can try. But there are many users who don't use a Gmail account and in this case, if they forget the phone password then they should move further and try other methods. Also Read: How to Unlock your Android Phone With Universal Unlock Pattern? Method 3: How to Unlock Any Android Device Manager Previously Android device manager, now known as "Find My Device" is the best use for locating the device when it is lost or stolen. Besides this, it can also be used to ring or lock your device. If you have ever used this feature then you might have noticed that it gives three options, "Ring", "Lock", and "Erase". Only you have to login into your Google account that is linked with the device and further, follows these steps and you are all set to bypass Android lock screen without factory reset: Visit www.google.com/android/find on any android device or on PC and then sign in to your Google account. Then select the Android device you want to unlock Select the 'lock' option from three options you get after selecting the device. Also you can add an optional phone number or recovery email. Now confirm it, go to your locked device, and enter the password that you have set now. Method 4: Use Backup PIN to Unlock Password of Android Phone This is yet another option that can help you to unlock your phone without a password and without factory reset. One thing you might have noticed is that when you have enabled pattern lock on your device then one security PIN was also asked at that time. So if you cannot unlock your device. For that, follow the below steps: Go to Android pattern lock After trying several times, you will get a message to try after 30 seconds There you will see the option "Backup PIN", click on it Here enter the backup PIN and the OK At last, entering the backup PIN can unlock your device Method 5: How to Unlock Samsung Phone Forgot Password Without Factory Reset? There are many Samsung users who face this type of problem and they cannot access their devices. If you are a Samsung user, and if you want to unlock your device then try the "Find My Mobile" option to get out of the situation. For that, you should have a Samsung account. After that follow the below steps and unlock Android phone without losing data using Find My Device: Visit findmymobile.samsung.com and sign in with your Samsung account. Select the 'Lock my screen' option in the left corner > enter a new PIN in the space provided and then hit on the LOCK option. After a few seconds, the password will be unlocked. I hope after following the above steps you finally got the answer of how to unlock Samsung phone forgot password without losing data and now you can access your phone. Also Read: Method 6: Unlock Android Phone Pattern Without Factory Reset Using ADB Android Debug Bridge (ADB) is also used to unlock Android phone passwords without factory reset. But one thing you should also know is that it is a time-consuming method and a little bit complicated compared to other methods. But you can try this and can unlock the phone password. So follow the below steps: Here you have to connect your device to the system via a USB To do this, you have to go to Settings > About Phone > click on the "Build Number" option seven times and it will enable the developer option on your device After that go to Settings > Developer options and switch on USB debugging Now after your device is connected to the system, launch the command "adb shell rm /data/system/gesture.key" and then press enter At last, simply restart your device and access it as usual. FAQs: Follow the steps to unlock Android phone with Google account using ADM: First, open com/android/device manager on the computer or even from a mobile phone Now in the ADM interface, select the device that you want to unlock and choose "Lock" You can unlock your Android phone password without losing data by using a professional tool. One such tool is Android Unlock which allows you to unlock any type of Android phone password, PIN, pattern, face lock, etc. There are ways to unlock LG phone password by following some useful ways. You can take the help of a professional tool like Android Unlock. Or you can follow the manual methods like ADB command, using Google account, via custom recovery (SD card required) or you can do a factory reset to unlock LG phone completely.
